8	Leave, Withdrawal and Absence
9	Academic Integrity and Misconduct
10	Student Records and Certificates
11	Grievance and Appeals
12	Frequently Applicable Rules

1. General Provisions

1.1 Purpose

These regulations establish the academic framework governing undergraduate and postgraduate students, including enrollment, attendance, assessment, grading, progression, academic integrity, and student records.

1.2 Applicability

The regulations apply to all students enrolled in programs administered by the University unless a program-specific regulation expressly provides a different rule.

1.3 Authority

The Academic Council is the principal academic authority for interpreting and approving academic regulations. Departments may issue supplementary procedures that do not conflict with these regulations.

1.4 Definitions

“Course” means an approved academic unit carrying credit. “Semester” means an academic teaching period. “Academic year” normally consists of two regular semesters. “Credit” represents the workload assigned to a course.

2. Admission and Enrollment

2.1 Admission

Admission shall be granted only to candidates who satisfy the eligibility criteria published for the relevant program and admission cycle.

2.2 Enrollment

A student must complete enrollment within the notified registration period. Failure to complete required registration may result in suspension of access to academic activities.

2.3 Course Registration

Students shall register for courses prescribed by their program. Elective courses are subject to availability, prerequisites, and applicable seat limits.

2.4 Prerequisites

A prerequisite course must normally be completed before a student may register for a dependent course. The Department may approve an exception where academically justified.

2.5 Maximum Academic Load

A student may normally register for up to 24 credits in a regular semester. The Dean may approve a higher load for students with strong academic standing.

3. Attendance Requirements

3.1 Minimum Attendance

Students must maintain at least 75% attendance in each registered course to be eligible for the end-semester examination.

3.2 Shortage

A student whose attendance falls below 75% may be declared ineligible for the end-semester examination in the affected course.

3.3 Attendance Relaxation

The competent academic authority may permit attendance relaxation of up to 10 percentage points in exceptional circumstances supported by documented evidence.

3.4 Calculation

Attendance is calculated from scheduled instructional sessions in which the student was required to participate. Approved academic activities may be counted as attendance where permitted by the Department.

3.5 Responsibility

Students are responsible for monitoring their attendance through the official academic information system and reporting discrepancies within seven calendar days of publication.

4. Academic Calendar and Registration

4.1 Academic Calendar

The University shall publish an academic calendar specifying teaching dates, examination periods, registration windows, holidays, and result publication milestones.

4.2 Add/Drop Period

Course additions or withdrawals may normally be made during the first two weeks of a semester, subject to program rules and approval requirements.

4.3 Late Registration

Late registration may be permitted only with approval of the designated authority and payment of any applicable administrative fee.

4.4 Examination Registration

Students must complete examination registration within the notified deadline. Failure to do so may prevent issuance of an examination admit card.

5. Assessment and Examinations

5.1 Continuous Assessment

Course assessment may include assignments, quizzes, laboratory work, projects, presentations, mid-semester examinations, and participation.

5.2 End-Semester Examination

Where prescribed, the end-semester examination shall normally contribute 40% to 60% of the total course grade.

5.3 Internal Assessment

Internal assessment records must be maintained by the course instructor and submitted through the approved academic process.

5.4 Examination Conduct

Students must carry a valid identity card and examination authorization where required. Unauthorized materials, electronic devices, communication, or impersonation are prohibited.

5.5 Absence

A student absent from an examination without approved grounds shall normally receive a zero for that assessment component.

5.6 Re-Examination

A supplementary or repeat examination may be offered according to the academic calendar and applicable program rules.

5.7 Examination Results

Results shall be published through the official student information system after approval by the competent academic authority.

6. Grading and Academic Performance

6.1 Letter Grades

The University may use the following standard grade scale for courses assessed on a 100-point basis.

Marks	Grade	Grade Point	Interpretation
90–100	A+	10	Outstanding
80–89	A	9	Excellent
70–79	B+	8	Very Good
60–69	B	7	Good
50–59	C	6	Satisfactory
40–49	D	5	Pass
Below 40	F	0	Fail

6.2 Grade Point Average (GPA). GPA is calculated as the credit-weighted average of grade points earned in the applicable courses. The cumulative GPA (CGPA) is calculated using all applicable completed courses according to the program's approved curriculum.

6.3 Pass Requirement. A student must obtain at least a D grade (or the program-defined minimum) in a course to receive credit for that course.

7. Academic Progression

7.1 Promotion

A student may progress to the next academic level when the minimum credit and academic performance requirements of the program have been satisfied.

7.2 Backlog Courses

A failed course may be repeated in a subsequent offering, subject to course availability and program restrictions.

7.3 Academic Warning

A student whose semester performance falls below the prescribed academic threshold may receive an academic warning and may be required to meet an academic advisor.

7.4 Probation

Students with persistent academic deficiency may be placed on academic probation. During probation, the University may limit the student's course load.

7.5 Graduation Eligibility

A student is eligible for award of a degree only after completing all prescribed credits, mandatory courses, project requirements, minimum academic standards, and institutional clearance procedures.

8. Leave, Withdrawal and Absence

8.1 Academic Leave

Students may request temporary academic leave for documented personal, academic, or other exceptional circumstances, subject to approval.

8.2 Medical or Emergency Absence

Where an absence is caused by a serious medical or emergency circumstance, supporting documentation should be submitted within the period specified by the University.

8.3 Semester Withdrawal

A student may request withdrawal from a semester before the notified deadline. Approved withdrawal shall be recorded in the academic record according to University procedure.

8.4 Course Withdrawal

Withdrawal from an individual course after the add/drop period requires approval and may result in a withdrawal notation on the transcript.

9. Academic Integrity and Misconduct

9.1 Academic Integrity

Students are expected to submit original work and accurately acknowledge sources, collaboration, data, and assistance.

9.2 Plagiarism

Presenting another person's words, ideas, code, data, or creative work as one's own without appropriate acknowledgment constitutes academic misconduct.

9.3 Cheating

Unauthorized assistance during an examination or assessment is prohibited.

9.4 Fabrication

Inventing or manipulating experimental results, attendance records, citations, documents, or academic data is prohibited.

9.5 Disciplinary Action

Depending on severity, violations may result in cancellation of an assessment, failure in a course, suspension, or other disciplinary action under the applicable student conduct procedure.

9.6 Due Process

A student accused of academic misconduct shall be informed of the allegation and provided an opportunity to respond before a final disciplinary decision is made.

10. Student Records and Certificates

10.1 Academic Record

The University shall maintain an official academic record containing registered courses, grades, credits, academic standing, and relevant approved academic actions.

10.2 Transcript

Students may request an official transcript through the designated administrative process, subject to applicable conditions.

10.3 Grade Correction

A grade correction may be initiated when an administrative or evaluation error is identified and verified through the prescribed process.

10.4 Degree Certificate

Degree certificates shall be issued to students who satisfy all graduation requirements and complete required institutional clearances.

11. Grievance and Appeals

11.1 Academic Grievance

A student who believes an academic decision was incorrectly applied may submit a written grievance to the designated authority within the notified period.

11.2 Grade Appeal

A grade appeal must identify the course, assessment component, and specific grounds for review. General dissatisfaction without academic grounds may not constitute sufficient basis for reassessment.

11.3 Review

The reviewing authority may examine relevant records, seek clarification from the course instructor, and communicate the final decision through the official channel.

11.4 Finality

Decisions of the competent appellate academic authority shall normally be final, subject to applicable University statutes.

12. Frequently Applicable Rules

12.1 Attendance Example

A student attending 38 out of 50 scheduled sessions has 76% attendance and satisfies the standard 75% attendance requirement.

12.2 Attendance Shortage Example

A student attending 35 out of 50 scheduled sessions has 70% attendance and is normally not eligible for the end-semester examination in that course.

12.3 Credit Example

If a program requires 160 credits for graduation, a student with 154 completed credits has not yet fulfilled the full credit requirement.

12.4 Academic Standing

A student should consult the official academic record and program handbook when determining eligibility for promotion, probation, or graduation.

12.5 Conflict of Rules

Where a program-specific approved regulation conflicts with this model document, the officially approved program regulation shall govern for that program.

End of Document

For RAG implementations, this document should be treated as a controlled knowledge source. When answering a student query, the assistant should retrieve the relevant section, preserve the document's conditions and exceptions, and avoid inventing rules not supported by the source.
